

Titan RustBuster

Product type

Strong acidic agent for removal of rust and lime scale. Titan Rust Buster removes rust even after prolonged corrosion and make surfaces clean before painting or other type of treatments. Titan Rust Buster cleans surfaces of rust even when fat and oil is present.

User instructions

Remove loose fragments and make the surface as clean as possible.

Dosage up to 50% depending on the amount of soil. Apply the solution manually or by spraying it on the object. Make sure to cover the entire surface well. Leave on until desired result, or use Vikan washing brush to shorten the duration time and increase effectiveness.

The product works immediately, but on deep rust spots, duration of up to 20 minutes is recommended or when product has dried.

Rinse well after the desired results with clean water.

Use recommended protective equipment during application.
